Gaggle Privacy Statement

Dear All Gaggle Students and Staff,

In, October 28, 2025 - 7:15 A.M. There was a news article stating that ("**Lawrence schools have ceased using Gaggle AI monitoring software, court documents say")** This statement came directly from the news article from the ("**The Lawrence Times")** stating that ("**Lawrence schools have ceased using Gaggle AI monitoring software, court documents say")** You might think why Lawrence Schools stopped using AI. Students made a report at **("August, nine")** former and current students at Lawrence schools filed a law suit against Lawrence Public Schools, because it **"Violated Student Privacy"** according to Gaggle FAQs:

("Access to certain student information remains the legal responsibility of the applicable school or district, which is required to comply with FERPA and its applicable regulations. One of FERPA's core tenets is the protection of the privacy of personally identifiable information (PII) in students' education records. Gaggle takes the privacy of student data very seriously. It is Gaggle's policy to comply with all applicable state and federal laws, including FERPA, when we have access to student data. We work in partnership with our educational institutions and agencies to diligently safeguard the personal information of students.

Gaggle only uses PII from students' education records to enable the use of Gaggle solutions. Unless a school official expressly instructs otherwise, we will not share or reuse PII from education records for any other purpose. For more details about Gaggle and FERPA, consult the Gaggle Student & Staff Data Privacy Notice (https://www.gaggle.net/student-data-privacy-notice).

There are a handful of exceptions to FERPA to allow school districts to share personal data without parental consent, commonly referred to as the "school officials" exception. Essentially, this allows school districts to share data with an outside party if the outside party (1) performs a service or function for which the school would otherwise use employees; (2) is under the direct control of the school district with respect to the use and maintenance of school records; and (3) complies with FERPA's requirements regarding the use and disclosure of personal student information.")

As Gaggle states, that they **DO NOT** collect data but they do collect some Data that comply with **FERPA (https://studentprivacy.ed.gov/faq/what-ferpa)** but the question is, does the school collect Information, because in Gaggle they **Track Location** and they Read and Change Site Data. According in the Chrome Extension. But, in Lightspeed they **DO NOT** collect any Location Data, only Read and Change Site Data, but in the ("**Lightspeed Insight Agent")** they do collect Location and many more. Possibly Gaggle might be collecting Location and many more. But, why does Gaggle collect Location? But, Lightspeed does not, and if their doing it for

Asset Management there is a thing called Gopher Buddy. Where it tracks almost everything it tracks, IP Address, device info, etc. So, our question is why does Gaggle and Lightspeed Insight Agent track us? There must be a reason behind why Gaggle tracks us. After reading this, you might think whose fault this is. The data that is being sent is the school. Because as the Gaggle Policy states that they never share data except some data that complies with **FERPA (https://studentprivacy.ed.gov/faq/what-ferpa)** now our location data is being sent to the School. Now, Gaggle is not doing anything. The fault goes to the school. Now what you can do to stop our location being shared is to share this Article/Pdf to your friends, families and whoever you know! To get to know what schools are installing in our systems.
